

HUMANS TO HUMANS

THE H-ACCELERATOR: SUMMER'22

Humans to Humans offers remote collaboration opportunities for university students to work with entrepreneurs with high growth and sustainable ventures to propel them to the next level. The H-Accelerator is currently accepting student applications for our Summer Program, which will run from **July 5, 2022 to August 20, 2022**.

Link to the student application: <https://airtable.com/shrjH2e2TpkfrdvYv>

Students selected for our second round of recruitment will be contacted via email for interviews over Google Meets. Applications are reviewed on a rolling basis. All acceptances will be sent out by the start of May 2022.

- **Student application deadline: Sunday, April 17th, 2022 at 11:59PM EST.**

If you have any questions about the application, please do not hesitate to contact us at: lalfaro.humanstohumans@gmail.com and visit our website: www.humanstohumans.us

ELIGIBILITY

- Recommended for incoming Juniors and Seniors in undergraduate degrees, as well as master and MBA students. First and second year university students are also welcome if their application is strong.
- Students must speak fluent English, French or Spanish. The H-Accelerator will be conducted primarily in English.

The program is an online remote collaboration opportunity that is unpaid. Funding opportunities and grants are available through your institutions. Contact the Recruitment Officer for more information.

APPLICATION PROCESS

Applications are open to university students for one of three positions:

- Public Relations/Marketing
- Business Development/Consulting
- Tech Role (front end & back end)

Following an initial screening process, selected students will pass onto behavioral interviews. They will meet two members of our management team. During the written application, students will have the chance to specify which sectors (agri-tech, retail, arts, healthcare, etc.) they would prefer working in. Applicants will get a chance to further develop their sector preference with interviewers.

Students successful post the interview stage will be selected for the third and final stage, involving case studies. Students will have 48 hours to work on assigned cases, which are much smaller projects than what students will typically encounter during the H-Accelerator. Accepted applicants are matched with entrepreneurs based on corresponding demands and skills.
